# Invest in Theatre Capacity

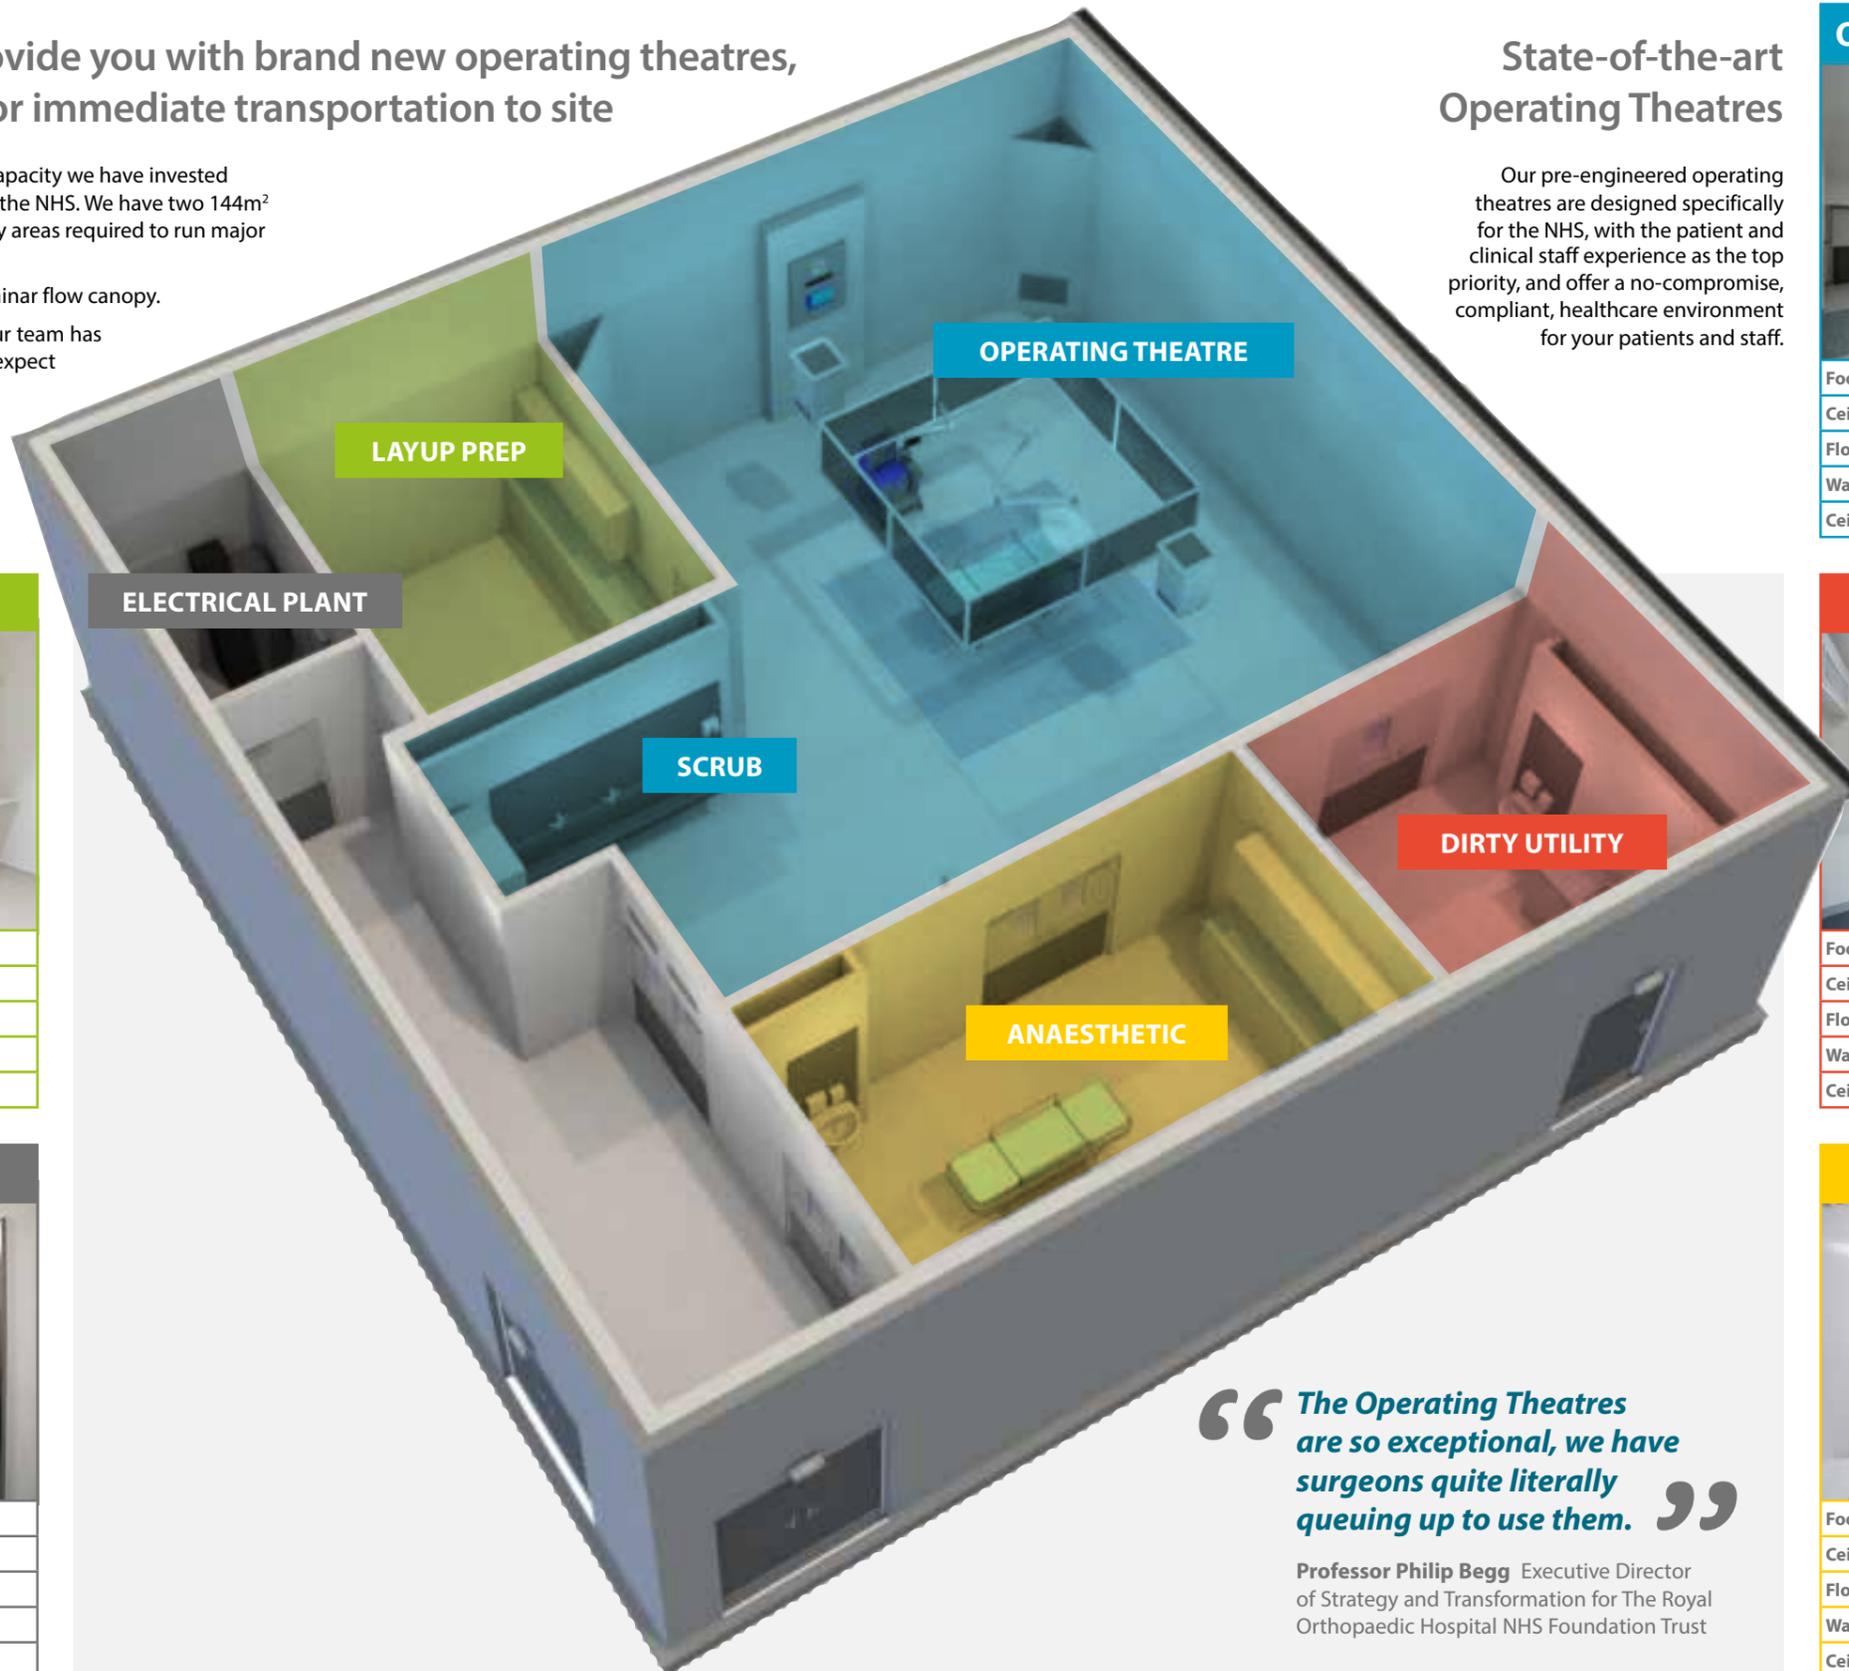

ModuleCo are able to provide you with brand new operating theatres, already built and ready for immediate transportation to site

To assist with the growing demand for theatre capacity we have invested £millions by pre-building operating theatres for the NHS. We have two 144m<sup>2</sup> operating theatre suites, containing all of the key areas required to run major surgery, available now for hire or purchase.

Theatres are available with or without a UCV laminar flow canopy.

Having delivered over 120 theatres in the UK, our team has learned precisely what clinical teams want and expect from a quality facility. The theatres available are our latest, NHS compliant design with a 60-year design life.

They are of the highest standard and designed for permanent installation even though they are available for hire.

## State-of-the-art Operating Theatres

Our pre-engineered operating theatres are designed specifically for the NHS, with the patient and clinical staff experience as the top priority, and offer a no-compromise, compliant, healthcare environment for your patients and staff.

## Appoint ModuleCo Directly Via Approved Procurement Frameworks

ModuleCo and ModuleCo Healthcare are accredited supplier on the NHS Shared Business Services Framework, the Crown Commercial Service Framework and the NHS Commercial Solutions Framework for the purchase and hire of bespoke modular healthcare buildings.

Our accreditations mean that you can fast-track the procurement exercise for our pre-built theatres using any of these OJEU compliant frameworks, removing the need for a lengthy and expensive tender process.
